

CORIAN® SOLID SURFACE

The Latin-America
54 colour portfolio

This Corian® Solid Surface paper palette is a flexible, handy and lightweight tool composed of high-definition printed paper samples which give a visual impression of what Corian® Solid Surface colors look like.

All printed colors were evaluated and compared to real Corian® Solid Surface samples under a 6000k lighting source.

This operation allowed the most accurate print match with the original material. The printed colors which present an accentuated metamerism, are mainly due to the mineral pigments contained in the inks.

Evaluation under different lighting conditions as well as differences in visual perception, could lead, for some colors, to appreciable differences between paper and material.

It is always advisable to evaluate the physical Corian® Solid Surface sample before making the final selection.

Please note: the color references reported are not necessarily indicative of the actual Corian® Solid Surface color, but they represent the closest match in some of the most used color scales (RAL, Pantone, NCS, RGB, L*a*b* and CMYK). DuPont can't be held responsible in case of mismatch.

Once opened the paper palette has a lifetime of one year.

Our Corian® Solid Surface color portfolio may contain heavily pigmented hues with random veins and reflective pigments. Veins may vary in intensity and highlight seams. Some colors may appear lighter or darker depending on the viewing angle and may require additional maintenance. Sample may not represent the full aesthetic.

We invite you to visit www.corian.com, check our online color tool or ask your Corian® Solid Surface sales contact for more information.

- * **Contains random veins:** veins may vary in intensity and highlight seams. Sample may not represent the full aesthetic.
- * **Translucent:** substrate shadowing may appear. Ideal for backlit applications.
- * **Contains reflective pigments:** may appear lighter or darker depending on viewing angle.
- * **Heavily pigmented:** may require additional maintenance.
- * **Contains large, randomly distributed particles:** sample may not represent the full aesthetic.
- * **Translucent, randomly veined:** veins may vary in intensity and highlight seams. Substrate shadowing may appear. Sample may not represent the full aesthetic.
- * **Heavily pigmented and veined:** veins may vary in intensity and highlight seams. May require additional maintenance. Sample may not represent the full aesthetic.
- * **Contains random veins and reflective pigments:** veins may vary in intensity and highlight seams. May appear lighter or darker depending on viewing angle. Sample may not represent the full aesthetic.
- * **Heavily pigmented with reflective pigments:** may appear lighter or darker depending on the viewing angle. May require additional maintenance.
- * **Heavily pigmented. Contains large, randomly distributed particles:** heavily pigmented. May require additional maintenance. Contains large, randomly distributed particles. Sample may not represent the full aesthetic.
- * **Heavily pigmented with random veins and reflective pigments:** veins may vary in intensity and highlight seams. May appear lighter or darker depending on the viewing angle. May require additional maintenance. Sample may not represent the full aesthetic.
